#### Chapter 1

#### Task description

The task is to make a graphical user interface to display the values of the sensor that are received by the oscilloscope via the UDP protocol.

#### Chapter 2

#### Development Environment

**Coding Language**: The project is developed on Java Version 7. To download the version 7, simply do yum install java-1.7.0-openjdk. For the sake of simplicity, the Java Version 7 should also be available on Windows as well.

Versioning: The software is versioned via GIT and is secured on the remote server.
